ABOUT ME

System Engineer with hands-on experience in IT support, network administration, and infrastructure maintenance. Skilled in Windows systems, Active Directory, VPN, firewall support, and endpoint troubleshooting. Focused on maintaining secure, reliable, and efficient IT operations.

WORK EXPERIENCE

System Engineer	PRECISION INFORMATICS' (M) PVT. LTD (POSTED AT THE MMD GROUP)	KOLKATA JUL 2025 - PRESENT
• Manage day-to-day IT infrastructure and system operations. • Administer Active Directory, including user account creation, password resets, and access management. • Troubleshoot LAN, VPN, DNS, DHCP, IP conflicts, and network connectivity issues. • Configure, maintain, and support enterprise mail server services. • Deploy, configure, and maintain Windows desktops and laptops. • Coordinate with hardware, networking, and ISP vendors for issue resolution. • Maintain IT asset inventory and technical documentation. • Provide Level-2 technical support for hardware, software, and network-related issues. • Support virtualization infrastructure using VMware ESXi.		
Facility Management Engineer	EASTERN SERVICES. (POSTED AT THE PARK HOTLE)	KOLKATA JUNE 2023 -JULY2025
• Delivered end-user support for hotel IT infrastructure. • Managed Oracle MICROS POS systems and resolved application issues. • Configured and maintained Aruba Wireless Controllers and Access Points. • Supported Antlabs SG5 Internet Gateway administration. • Performed LAN troubleshooting and network maintenance. • Installed and configured Windows operating systems and software. • Diagnosed hardware failures and coordinated warranty support. • Managed printers, scanners, POS devices, and peripheral equipment. • Performed preventive maintenance to ensure uninterrupted IT operations.		
IT Executive	FUSION BPO SERVICES	KOLKATA APRIL 2022 - JUNE 2023
• Installed and configured Windows 10/11 operating systems. • Resolved hardware, software, printer, and networking issues. • Provided remote and onsite technical support. • Managed software installation, updates, and system maintenance. • Assisted in Active Directory user management. • Maintained IT asset inventory and documentation. • Supported users through ticketing systems and remote assistance tools. • Ensured timely resolution of IT incidents within SLA.
